

# HEPATITIS B VIRUS VACCINE CONSENT/DECLINATION

## BLOODBORNE PATHOGENS

I have received information and understand that my occupation increases risks of exposure to bloodborne pathogens including hepatitis B virus (HBV). This exposure includes blood, body fluids and other potentially infectious material and surfaces. The facility's exposure control program has been explained to me and I understand the process to follow should an exposure incident occur.

I have been informed of the symptoms, hazards and transmission modes associated with the hepatitis B virus and that a vaccine is available to me at no additional cost. I have received information regarding the hepatitis B vaccine.

Date VIS Provided: \_\_\_\_\_

## HEPATITIS B VACCINE DECLINATION

*Occupational Safety & Health Administration: Standard Number 1910.1030 Appendix A*

I understand that due to my occupational exposure to blood or other potentially infectious materials I may be at risk of acquiring hepatitis B virus (HBV) infection. I have been given the opportunity to be vaccinated with hepatitis B vaccine, at no charge to myself. However, I decline hepatitis B vaccination at this time. I understand that by declining this vaccine, I continue to be at risk of acquiring hepatitis B, a serious disease. If in the future I continue to have occupational exposure to blood or other potentially infectious materials and I want to be vaccinated with hepatitis B vaccine, I can receive the vaccination series at no charge to me.
